

## How to Connect to Goucher Wireless for Vista

Go to **Start** menu and click **Connect To**.

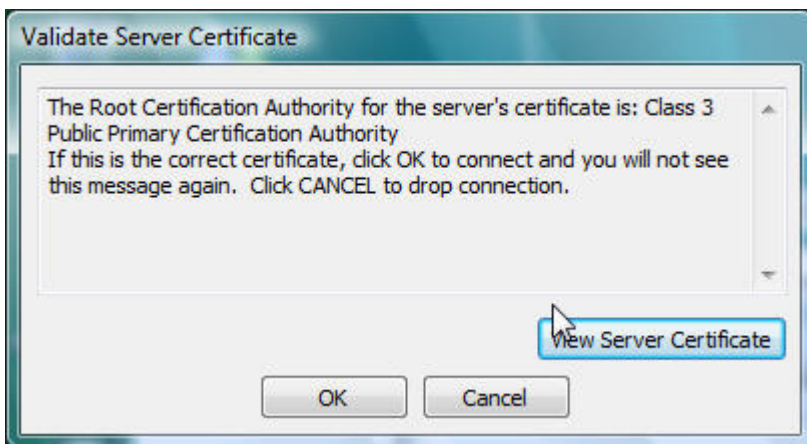

A list of wireless networks will appear. Select **goucher** and click **Connect**. If a list does not appear, click the refresh icon or make sure that wireless is on.

Click **Enter/select additional log on information** when prompted.

You will then be prompted to enter your Goucher username and password. Leave the Logon domain filled blank and click **OK**.

You may be prompted again to enter/select additional information. If so, the **Validate Server Certificate** will appear. Click **OK** to continue.

**Please note:** You may be prompted more than once to either enter your credentials or validate the certificate. Please be patient. If you are prompted continuously for your credentials, please ensure that you are typing the correct username and password. Once you've entered your credentials and validated the certificate, you will then be connected to the "goucher" wireless network. Please contact the Help Desk (410-337-6322) if further assistance is needed.

As soon as you connect to the network, launch your Internet browser and you will be prompted to register your computer through Campus Manager. Please follow the directions on the screen to complete the registration process. For more information on Campus Manager, please visit the **Campus Manager FAQ** page at [www.goucher.edu/x2907.xml](http://www.goucher.edu/x2907.xml).
