*Items in **RED** text have available upgrades. They are listed as the current version and the available upgrade is within parentheses. We plan to install the latest available version.*

Please note that the versions of all standard software listed may change if updates are released. If there is any software that needs to be updated outside of the software listed in the “standard software” section above, please let Rob Pfeffer with Information Technology know ASAP.

Mac OS X 10.5 and Apple provided software will be updated to the latest patch level available at time of installation or upgrade and thus specific version numbers are omitted.
